

I am writing about my experience with Christine Gribble. We had a great experience during our photography session. She was kind, patient and professional.

We have two children that both are diagnosed with Autism. They are ages 5 and 7. To say that my sons are "busy boys" would be an understatement! They are very active and constantly on the go. They also struggle with understanding and following direction, which has always made getting pictures of them very difficult.

Christine chose a beautiful setting where the kids could explore and she also could get wonderful pictures. She allowed the boys to be active and be themselves. She was patient, even when my youngest son jumped in a small pool of water! She waited while we dried him off so that we could continue getting more pictures of my older (still dry) son.

The pictures really are beautiful and capture their spirit. Everyone that has seen these pictures has commented on how wonderful and magical they are. I am so grateful that Christine was able to not only provide us with wonderful pictures, but also a very special, stress free experience.

Thank you!!

Sincerely,

Jennifer
