

My son and I had a wonderful experience with Christine Gribble. Alex is five years old. He is handsome, funny and precocious. He is also severely disabled with cerebral palsy. He doesn't sit up independently, and he doesn't walk. Christine handled all of this in stride.

Christine arrived at our house (home visits!), scoped out the perfect spot, discussed a few arrangements and within a short time she was finished. She assured me there would be plenty of beautiful photos and she was right. The photographs are absolutely gorgeous and we've received rave reviews from family and friends.

I appreciate that Christine avoided the traditional stiff and stilted studio photo shoot. Alex wore what he was comfortable in and was in his natural environment at home. The entire process was quick, painless, and fun. She kept my child happy and engaged and was able to get the best expressions out of him extremely quickly.

I will be using Christine again for a family portrait, and I recommend her without hesitation.

Terry
